

# AT&T Wavelength services\*

Point-to-point connectivity with high-capacity bandwidth and ultra-low latency

## Ultra-fast data sharing

- Direct, private connection between locations
- Speeds up to 400Gbps
- Ultra-low latency routes
- Great for high-bandwidth needs such as artificial intelligence (AI) or data backup

## Secure and reliable connectivity

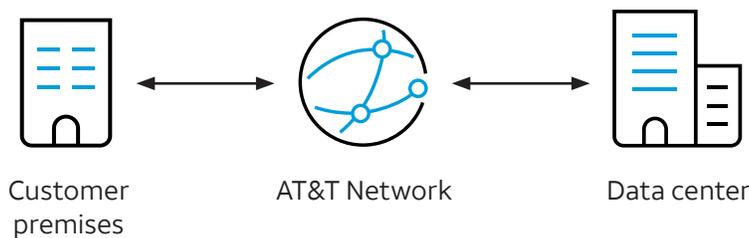

- Up to 99.999% service availability
- Industry-leading service level agreements
- Credits available for out-of-service conditions
- Private, secure connection between data centers and enterprise locations
- 24/7 network monitoring options

## Solutions that help you scale

- Transmit data over long distances to multiple metropolitan areas
- Create a fully diverse and resilient network
- Single network able to support multiple transport options

## Connect locally or across the country

## A network that works for you

- Run demanding applications like AI, voice over internet protocol (VoIP), video, and cloud services
- Helps secure sensitive data that's shared across locations
- Build dual-path connectivity in case of an outage
- Avoid congestion common with public connections

\*Includes AT&T Wavelength Metro<sup>SM</sup> and AT&T Wavelength Long Haul<sup>SM</sup>

## Why AT&T Business?

See how ultra-fast, reliable fiber and 5G connectivity, protected by built-in security, give you a new level of confidence in the possibilities of your network. Let our experts work with you to solve your challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.
