ETHERNET BY FRONTIER

Frontier is now a Verizon company

Seamless Multi-Site Connectivity

Two locations? Two thousand? Seamless connectivity and performance keep your sites connected and collaborating. With Frontier Multi-Site Connectivity solutions you get secure, reliable and scalable connectivity across locations to keep great ideas flowing.

High performance

Get speeds up to 100 GB to move data faster across your WAN

Security

Protect sensitive data from internet exposure

Reliability & resiliency

Stay up and running with 99.99% availability and 4-hour MTTR (mean time to repair)

Simplicity

Simplify network management with 24/7 support available through the NOC.

Choose Your Multi-Site Connectivity Solution

EPL (Ethernet Private Line)

- Provides point-to-point connectivity between two locations.
- Great for mid-sized companies connecting a single location to headquarters.

EVPL (Ethernet Virtual Private Line)

- Connects three or more locations in a hub-and-spoke configuration, ensuring communication only takes place between a hub and spoke, never between spokes.
- EVPL allows for multiplexing. With a multiplexed UNI at the hub location enabling multiple EVC connections.

EP-LAN (Ethernet Private Local Area Network)

- EP-LAN is a port based service that connects three or more locations in a "any to any" topology.
- Supports "all to one" bundling of customer VLANs.

EVP-LAN (Ethernet Virtual Private Local Area Network)

- EVP-LAN is a VLAN based service that connects three or more locations in an "any to any" configuration.
- VLAN aware supporting multiple VLANs and supports multiplexed UNIs.
