Ethernet

Solid, reliable bandwidth - up to 40G you can count on

Why Choose Zayo for Ethernet?

Our Ethernet, built on the largest independently owned fiber network, incorporates our expansive long haul and metro fiber networks, providing multiple routes to ensure seamless traffic flow. With options available up to 40G, we automatically boost capacity on our core network as soon as it reaches 50% capacity use. This means you'll always have the bandwidth and speed you pay for, ensuring uninterrupted connectivity for your business operations.

Here's why Zayo's Ethernet stands out:

Flexible Solutions:

Tailored to Your Business Model: We understand that every business is unique. That's why our Ethernet solutions are customizable to fit your specific needs, offering diverse configurations and scalable bandwidth options.

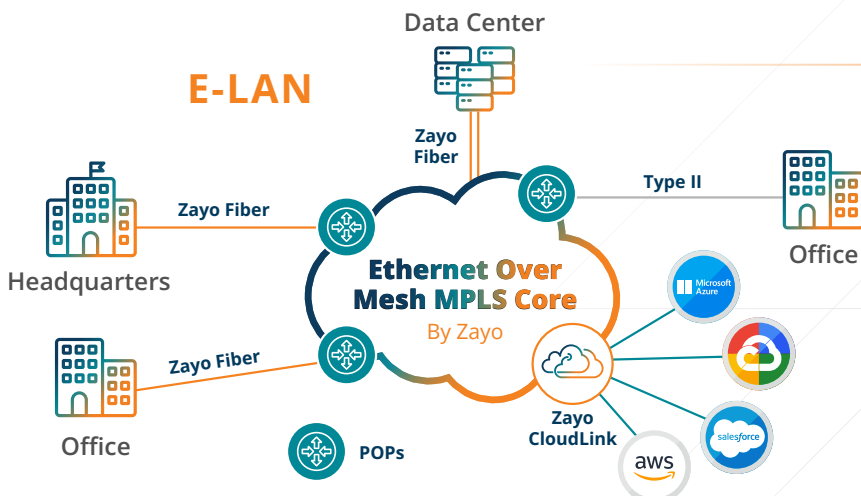

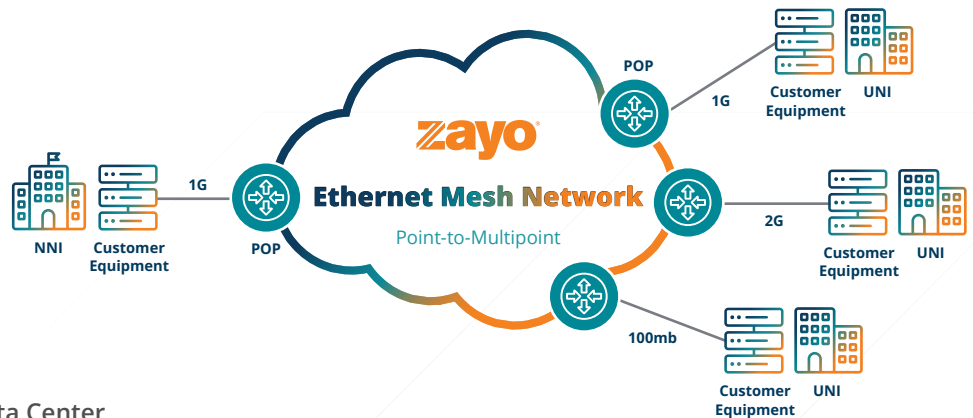

Reliability and Performance:

Zayo's Core Advantage: Our Ethernet is backed by a self-healing MPLS core, ensuring maximum uptime and reliability. You can trust Zayo to deliver consistent performance every step of the way.

Secure Networking:

Safeguarding Your Data: Security is our top priority. That's why Zayo's Ethernet operates on a secure network, always prioritizing your traffic over higher layer services.

Benefits of Choosing Zayo's Ethernet

Tailored Solution Just for You

- Customize your network to fit your unique needs with Zayo's diverse range of options, including diverse POPs, routes, equipment, and more.
- Choose your preferred bandwidth from scalable, committed, and burstable options ranging from 10Mbps to 40Gbps.
- Zayo can even offer 100G of dedicated Ethernet bandwidth.
- Prioritize your traffic with Zayo's Quality of Service (QoS) offering, ensuring enhanced performance with up to 4 QoS queues.
- Select your desired network topology, whether it's Ethernet Private Line (E-Line), Ethernet Virtual Private Line (EVPL), or Ethernet Local Area Network (ELAN).
- Benefit from our continuous network expansion efforts, including adding fiber miles, unique routes, buildings, and Points of Presence (PoPs), ensuring a seamless end-to-end Ethernet solution.

Reliability & Performance You Can Count On

- Experience superior performance with our self-healing MPLS network that intelligently routes traffic over multiple fiber paths.
- Rest assured with Zayo's industry-leading Service Level Agreements (SLAs) guaranteeing reliability and uptime.
- Say goodbye to congestion and latency with Zayo's automatic capacity augmentation at 50% utilization, ensuring a fast and reliable traffic flow.
- Explore our vast capacity of 35+Tb and over 380 Ethernet edge routers, providing you with the ability to connect effortlessly across the globe.

Support Every Step of the Way

- Count on Zayo as your single global Ethernet provider, offering end-to-end accountability for your network.
- Access 24x7x365 support from our dedicated Network Operations Center (NOC), ensuring assistance whenever you need it.
- Gain real-time visibility and network routing transparency through Tranzact, our self-service customer portal.
- Transport your data securely on Zayo's private, protected, carrier-class network, avoiding the vulnerabilities of the public Internet.
